<b>Initial Accreditation:</b>	2024-06-28
<b>Most Recent Reaccreditation:</b>	2025-05-21
<b>Accreditation Valid to:</b>	2028-06-28

### Additional Fixed Office Locations:

Refer to the legal entity location identified at the top of this listing. There are no additional locations included in this scope of accreditation:

### Protected Mark:

### Product Certification Scheme:

ISO/IEC 17067, Conformity assessment - Fundamentals of product certification and guidelines for product certification schemes, *scheme type 5* most closely resembles the product certification scheme operated by this organization. The surveillance part of this scheme allows for the choice between periodically taking samples of the product either from the point of production, or from the market, or from both, and subjecting them to determination activities to check that items produced subsequent to the initial attestation fulfil the specified requirements. The surveillance includes periodic assessment of the production process, or audit of the management system, or both. The extent to which the four surveillance activities are conducted may be varied for a given situation, as defined in the scheme. If the surveillance includes audit of the management system, an initial audit of the management system will be needed.

### Scope of Accreditation:

The scope of accreditation for the above-mentioned legal entity limits the use of the certification mark shown, to products that meet standards classified by the following international classification coding:

ICS No.	Title	Purpose
79.060.01	Wood-based panels in general	Performance
79.060.10	Plywood	Performance
79.060.20	Fibre and particle boards	Performance

ICS No.	Title	Purpose
91.060.10	Walls. Partitions. Façades	Performance (Method of static load test for shear resistance of framed walls for buildings)
91.060.20	Roofs	Performance (Performance of wood and wood-based floor and roof sheathing under concentrated static and impact load)
91.060.30	Ceilings. Floors. Stairs	Performance (Performance of wood and wood-based floor and roof sheathing under concentrated static and impact load)
91.080.20	Timber structures	Performance (Wood-based panels - Test Methods for Structural Properties & Uniform, concentrated static and concentrated impact loads on wood-based roof and floor panel assemblies.)

This document forms part of the Certificate of Accreditation issued by the Standards Council of Canada (SCC) to Benchmark Holdings, LLC. The original version is available in the Directory of Accredited Product, Process and Service Certification Bodies on the SCC website at [www.scc-ccn.ca](http://www.scc-ccn.ca)
