

TESTING AND CALIBRATION LABORATORY ACCREDITATION PROGRAM (LAP)

Scope of Accreditation

La présente portée d'accréditation existe également en français et est publiée séparément.

Legal Name of Accredited Laboratory: **University of Guelph**

Location Name or Operating as (if applicable): LABORATORY SERVICES DIVISION

Contact Name: Elizabeth (Liz) King

Address: 95 Stone Road West P.O. Box 3650
Guelph, Ontario
N1G 2Z4
(See Note 1 for veterinary testing)

Telephone: 519 823-1268 ext 57258

Fax: 519 767-6240

Website: www.guelphlabservices.com

Email: kinge@uoguelph.ca

To ensure compliance with the Official Languages Act, the Standards Council of Canada (SCC) translated proprietary content from French to English when it was not available in English. In case of discrepancies between the English and French versions, the original version prevails.

SCC File Number:	15167
Accreditation Standard(s):	ISO/IEC 17025:2017 General requirements for the competence of testing and calibration laboratories
Fields of Testing:	Biological Chemical/Physical
Program Specialty Area:	Agriculture Inputs, Food, Animal Health and Plant Protection (AFAP) Test Method Development and Evaluation and Non-routine Testing (TMDNRT)
Initial Accreditation:	1992-10-06
Most Recent Accreditation:	2025-06-05
Accreditation Valid to:	2028-10-06

OTHER SCOPE(S)

The laboratory has a separately issued GLP Areas of Recognition scope that can be viewed at <http://www.scc.ca/en/search/palcan/> . Simply type in the facility name to access the document.

TEST METHOD DEVELOPMENT & EVALUATION AND NON-ROUTINE TESTING

Description of activities - chemical analysis:

Animal and plants (agriculture), feed, food, water and environmental samples

Food and edible products: edible animal fat, dairy products, eggs, feed, meat, edible meat offal and animal blood, serum, plasma, urine, thyroid and retina. For food allergens, veterinary drug residues, pesticides and pollutants which include the following classes of compounds: anthelmintics, antibiotics, analgesics, antimicrobials, beta-agonists, coccidiostats, hormones and hormone-like substances, industrial pollutants, non-steroidal anti-inflammatories, tranquilizers and pesticides.

1. Development and validation of new testing methodology for the screening and determination of food allergens, veterinary drug residues, pesticides and pollutants in animal tissue, biological fluids, food, feed, water and environmental samples.
2. Modification, improvement and validation of published or existing test methodology for the screening and determination of food allergens, veterinary drug residues, pesticides and pollutants in animal tissue, biological fluids, feed, food, water and environmental samples.
3. Development of testing methods for the assessment and validation of commercially available test kits for the screening and determination of food allergens, veterinary drug residues, pesticides and pollutants in animal tissue, biological fluids, food, water and environmental samples.
4. Development and validation of mass spectral techniques for the confirmation of the identity of veterinary drug residues, pesticides and pollutants in animal tissue, biological fluids, feed, food, water and environmental samples.

Description of techniques – chemical analysis:

1. Sample preparation/extraction techniques including; homogenization, solid phase extraction (SPE), liquid-liquid extraction (LLE), acid digestion, QuEChERS, and soxhlet.
2. Charm® tests analyses.
3. Chromatographic based analysis (LC & GC coupled with various detectors including MS and MS/MS),
4. Inductively coupled plasma spectroscopy (ICP).
5. Enzyme linked immunosorbent assay (ELISA.)

Description of activities – microbiology analysis:

1. Development and validation of analytical methods for detection, isolation, identification and characterization of microorganisms including bacteria, viruses, parasites, yeast and molds in food, feed, water and environmental samples.
2. Development, evaluation and validation of new test kits including commercial test kits for the detection and/or enumeration of microorganisms in food, feed, water and environmental samples.
3. Modification, improvement and validation of published or existing methods for detection and/or enumeration of microorganisms in food, feed, water and environmental samples.

Description of techniques - microbiology analysis

1. Sample preparation, including immunomagnetic separation
2. Culture detection, isolation, identification, and characterization including biochemical confirmation.
3. Enumeration, including most probable number (MPN)
4. Polymerase chain reaction (PCR)
5. Enzyme linked immunosorbent assay (ELISA)

Description of activities - molecular biology analysis

1. Development and validation of molecular methods for detection and/or identification of pathogens and other organisms in food, feed, and environmental samples, and for DNA fingerprinting, genotyping and/or DNA barcoding of microorganisms, plants and animals.
2. Development, evaluation and validation of new test kits including commercial kits for detection and/or identification of pathogens and other organisms in food, feed, water and environmental samples and for DNA fingerprinting, genotyping and/or DNA barcoding of microorganisms, plants and animals.
3. Modification, improvement and validation of published or existing methods for detection and/or identification of pathogens and other organisms in food, feed, water and environmental samples, and for DNA fingerprinting, genotyping and/or DNA barcoding of microorganisms, plants and animals.

Description of techniques - molecular biology analysis

1. DNA/RNA extraction
2. Polymerase chain reaction (PCR), including quantitative PCR
3. DNA sequencing, including DNA barcoding
4. DNA fingerprinting or genotyping
5. Enzyme linked immunosorbent assay (ELISA)

Description of activities - animal health analysis

1. Development and validation of methods for detection, isolation, identification and characterization of microorganisms including bacteria, mycoplasma, prions, viruses, parasites, yeast and molds in animal samples.
2. Development, evaluation and validation of new tests including commercial kits or reagents for genetic material including pathogen detection and/or identification in animal samples.
3. Modification, improvement and validation of published or existing methods for genetic material including pathogen detection and/or identification in animal samples.

Description of techniques - animal health analysis

1. Culture detection of microorganisms
2. Inorganic analysis by inductively coupled plasma spectroscopy (ICP)
3. Enzyme linked immunosorbent assay (ELISA)
4. Agglutination
5. Polymerase chain reaction PCR
6. Whole genome sequencing

The Animal Health Laboratory identifies unknown hazards in a range of matrices, for example, animal samples, feed, soil, and plants. Hazards include infectious agents (bacteria, mycoplasmas, yeast, molds,

prions, viruses, and parasites), organic and inorganic elements and compounds. Infectious agents are detected directly or indirectly through various technologies, for example, culture, ELISA and PCR.

Current controlled lists of test methods under flexible scope for AFL and AHL are maintained by the laboratory and are available upon request.

Procedures used for test method development, nonroutine testing, and flexible scope are listed below

95S-021 Method verification/validation

95S-031 Management of test method development projects

95S-032 Management of infrequently conducted and non-routine tests

AHL-050 AHL test method development (TMD), validation/verification and non routine testing NRT

LSD-052 Managing methods accredited under ISO/IEC 17025 flexible scope

ANIMAL AND PLANTS (AGRICULTURE)

Foods and Edible Products (Human and Animal Consumption):

Tests performed in the Agriculture and Food Laboratory (AFL) at 95 Stone Road W., Guelph unless otherwise noted.

(General)

IMC-417 (CHEM-004)	Quantitative detection of soy protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs
*CHEM-057	Determination of iodine in tissues, feeds, raw and processed fruits and vegetables, and raw and processed milk by inductively coupled plasma-mass spectrometry Except for: tissues, feeds
CHEM-109	Antibiotic residues in honey by LC-MS/MS for chloramphenicol, erythromycin, lincomycin, sulfonamides (sulfacetamide, sulfabenzamide, sulfachloropyridazine, sulfadiazine, sulfadimethoxine, sulfadoxine, sulfaethoxypyridazine, sulfaguanidine, sulfamerazine, sulfamethazine, sulfanilamide, sulfanitran, sulfapyridine, sulfaquinoxaline, sulfathiazole),
IMC-440 (CHEM-241)	Quantitative detection of sesame protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs
IMC-003 (CHEM-255)	Quantitative detection of mustard protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs
IMC-411	Quantitative detection of vomitoxin in cereal samples by an enzyme linked immunosorbent assay (ELISA) in cereal and cereal products, including silage
IMC-412	Quantitative detection of egg protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs

IMC-413	Quantitative detection of milk protein by an enzyme linked immunosorbent assay (ELISA) for total milk, beta-lactoglobulin, and casein in food products, food ingredients, and swabs
IMC-414	Quantitative detection of peanut protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs
IMC-416	Quantitative detection of gliadin protein by an enzyme linked immunosorbent assay (ELISA) in food products, food ingredients, and swabs with gliadin reported as gluten
IMC-445 (CHEM-068)	Quantitative detection of tree nut proteins by enzyme linked immunosorbent assays (ELISA) for: almond, hazelnut, pecan, walnut, and coconut in food products, food ingredients, and swabs
MFHPB-03	Determination of the pH of foods including foods in hermetically sealed containers (MID-233)
MFHPB-10	Isolation of <i>Escherichia coli</i> O157:H7/NM from foods and environmental surface samples (MID-125)
MFHPB-18	Determination of the Aerobic Colony Counts in Foods (MID-101)
MFHPB-20	Isolation and Identification of <i>Salmonella</i> from Food and Environmental Surface Samples (MID-112)
MFHPB-21	Enumeration of <i>Staphylococcus aureus</i> in Foods (MID-115)
MFHPB-22	Enumeration of yeasts and moulds in foods (MID-129)
MFHPB-27	Enumeration of <i>Escherichia coli</i> in Foods by a Direct Plating (DP) Method (MID-258)
MFHPB-30	Isolation of <i>Listeria monocytogenes</i> and other <i>Listeria spp.</i> from foods and environmental samples (MID-113)
MFHPB-31	Determination of coliforms in foods using violet red bile agar (MID-285)
MFHPB-33	Enumeration of Total Aerobic Bacteria in Food Products and Food Ingredients using 3M™ Petrifilm™ Aerobic Count Plates (MID-103) for food products, food ingredients and environmental surface samples
MFHPB-34	Enumeration of <i>Escherichia coli</i> and coliforms in food products and food ingredients using 3M Petrifilm™ <i>E. coli</i> count plates (MID-107) for food products, food ingredients and environmental surface samples
MFLP-28	Detection of <i>Listeria monocytogenes</i> in a Variety of Foods and Environmental Surfaces Using the BAX® System <i>L. monocytogenes</i> Assay (MID-221)
MFLP-29	Detection of <i>Salmonella</i> in Foods and Environmental Surface Samples Using the BAX® System <i>Salmonella</i> Assay (MID-217)
MFLP-30	Detection of <i>Escherichia coli</i> O157:H7 in select foods using BAX® System <i>E. coli</i> O157:H7 MP (MID-220)
MFLP-42	Isolation and enumeration of the <i>Bacillus cereus</i> group in foods (MID-119)
MFLP-66	Determination of water activity using the Aqualab instrument (MID-055) for food

MFLP-74	Enumeration of <i>Listeria monocytogenes</i> in foods (MID-123)
MFLP-79	Detection of <i>Listeria</i> spp. in Environmental Surface Samples Using the BAX® System Real-Time PCR Assay for <i>Listeria</i> Genus (MID-291)
MFLP-86	Identification of <i>vt1</i> and <i>vt2</i> genes from Verotoxigenic <i>Escherichia coli</i> by Polymerase Chain Reaction (MOL-253) for pure culture <i>Escherichia coli</i>
MID-149	Enumeration of <i>Salmonella</i> in Food and Environmental Samples by MPN (Modified MFHPB-20)
MID-150	Enumeration of <i>Campylobacter</i> in food and environmental samples by MPN (Modified USDA FSIS ch6)
MID-157	Enumeration of <i>Listeria monocytogenes</i> in Foods using a Most Probable Number (MPN) Technique
MID-163	Isolation and Identification of <i>Salmonella</i> species in animal feed and environmental samples by Immunomagnetic separation (IMS) (modified MFLP-84)
MID-297	Detection, isolation and identification of <i>Salmonella enterica</i> and <i>Salmonella</i> Enteritidis in poultry environmental samples by real-time PCR and immunomagnetic separation (IMS)
MLG 41	Isolating and identifying <i>Campylobacter jejuni/coli/lari</i> from poultry rinsate, sponge and raw product samples (MID-243)
TOPS-142	Multi-residue pesticide determination by liquid chromatography/electrospray ionization-tandem mass spectrometry (LC/ESI-MS/MS) and gas chromatography-tandem mass spectrometry (GC-MS/MS) Modified CFIA method PMR-006-V1.0 for fruits, vegetables, fresh and processed food
*TOXI-024	Elements in food, feeds, forage and other matrices by ICP-OES for calcium, potassium, magnesium, sulfur, sodium, and phosphorus. Selenium (Se) only in mineral premixes and supplements for animal consumption
*TOXI-064	ICP-MS analysis of metals in foods for aluminum, antimony, arsenic, boron, beryllium, cadmium, chromium, cobalt, copper, iron, lead, magnesium, manganese, mercury, molybdenum, nickel, selenium, tin, titanium, and zinc

Dairy Products

MID-045	Alkaline phosphatase testing in dairy products by fluorometric method
---------	---

(Milk-Unpasteurized)

CHEM-061	Charm® II Amphenicols test for milk ⁴ for: chloramphenicol for raw commingled cow milk
CHEM-115	Charm® QUAD1 Test for Beta-lactams, Quinolones, Sulfonamides, and Tetracyclines in Raw Commingled Cow Milk ⁴
CHEM-119	CHARM® Trio Test for beta-lactams, sulfa drugs, and tetracyclines in raw commingled cow milk ⁴

CHEM-120	Charm® QUAD2 Test for Macrolides in Raw Commingled Cow and Goat Milk ⁴
CHEM-121	Charm® QUAD3 test for aminoglycosides in raw commingled cow milk ⁴
CHEM-308	CHARM® Sulfa test for raw commingled goat milk at MRL ⁴
CHEM-309	CHARMBeta-lactam and tetracycline test for raw commingled goat milk ⁴
CHEM-343	Aminoglycosides Confirmation in Bovine Milk by LC-MS/MS for streptomycin (STREP), spectinomycin (SPECT), gentamicin (GEN) and neomycin (NEO)
CHEM-359	Charm® neomycin, streptomycin and gentamicin test for raw commingled cow, goat, and sheep milk ⁴ Only for raw cow and goat milk
DA-102	Fat, protein, lactose, other solids (LOS), freezing point and somatic cell in milk by Infrared and Fluoro-Opto-electronic milk analyzers (Modified IDF148-2 - ISO 13366-2 and IDF 141C:2000 - ISO 9622:1999) for raw milk
DA-109	Milk urea nitrogen (MUN) in milk by infrared milk analyzers (Infrared method) for raw milk
DA-301	Enumeration of total bacteria in raw milk- BactoScan FC Operation (Bactoscan FC method) for raw milk
DA-500	Determination of freezing point by Cryoscope (Modified IDF 108 - ISO 5764) for raw milk
DRUGS-101	Standard Disk Assay for the Detection of Antimicrobial Inhibitors in Milk
DRUGS-123	Charm II® Macrolide Test for Milk ⁴ for raw commingled cow milk
DRUGS-237	CHARM® Sulfa test for raw commingled cow milk ⁴

Feeds

DRUGS-226	Tiamulin hydrogen fumarate in mixed swine feed by HPLC-UV
DRUGS-233	Monensin potency in type B and type C medicated feeds by HPLC using post-column derivatization
DRUGS-234	Narasin potency in type B and type C medicated feeds by HPLC using post-column derivatization
DRUGS-235	Determination of tilmicosin in Swine Feeds (100 mg/kg to 600 mg/kg) by HPLC
DRUGS-236	Determination of ractopamine hydrochloride in swine feed, cattle feed, cattle liquid feed and turkey feed by HPLC
*TOXI-013	Liquid chromatographic determination of monensin, narasin and salinomycin in feeds using post-column derivatization
CHEM-071	Extractable sodium and zinc from animal feed by ICP-OES only for: relative measurements of homogeneity of mixed feeds

(Fruits and Vegetables)

CHEM-069	Acidic herbicides (Phenoxy) in environmental and food matrices by LC-ESI/MS/MS for fruits, vegetables, fresh and processed food
CHEM-334	Polar Pesticide determination by liquid chromatography/electrospray ionization-tandem mass spectrometry (LC/ESI-MS/MS) for fruits, vegetables, fresh and processed food
CHEM-355	Dithiocarbamates in food by liquid chromatography/electrospray ionization-tandem mass spectrometry (LC-ESI-MSMS) for fruits, vegetables, fresh and processed food
TOPS-122	Amitraz determination in fresh and processed fruits, and vegetables and honey using GC-MSD (Modified CFIA method CSP-006-V1.0)
TOPS-142	See Food and Edible Products, above

Meat and Edible Meat Offal

EML-101	The double separatory funnel procedure for the detection of <i>Trichinella</i> larvae in pork and horse meat. (A combination of the modified CFIA method for The Double Separatory Funnel Digestion Procedure for the Detection of <i>Trichinella</i> Larvae in Pork and the modified CFIA method for The Double Separatory Funnel Digestion Procedure for the Detection of <i>Trichinella</i> Larvae in Horse Meat)
CHEM-003	Quantitative determination of aminoglycosides in tissue using LC-MS/MS for: Streptomycin, gentamicin and neomycin
CHEM-337	Veterinary drug residues in foods of animal origin by LC-MS/MS for animal tissue
DRUGS-009	Beta-agonists in tissue and retina by LC-MS/MS for: clenbuterol, salbutamol, ractopamine, cimaterol, brombuterol, clenpenterol, hydroxymethylclenbuterol, isoxsuprine, mabuterol, ritodrine, terbutaline, tulobuterol, and zilpaterol

(Molecular Biology)

MOL-020	Microbial species ID determination based on 16S/18S rRNA gene or ITS sequencing for pure culture bacteria, yeast, or mold
MOL-171	Detection of Residual Bovine, Ruminant, Porcine, Animal and Rice DNA in Feed and Food Samples using polymerase chain reaction
MOL-198	Plant, animal, and fish species ID determination by DNA barcoding for single species plant, animal or fish tissue
MOL-239	Speciation of presumptive <i>Campylobacter jejuni</i> and <i>C. coli</i> colonies by multiplex Polymerase Chain Reaction (mPCR) (CFIA method) for pure culture <i>Campylobacter</i> spp.
MOL-250	Quantification of residual bovine DNA in feed samples using the droplet digital polymerase chain reaction (ddPCR) technology

(Plant Tissue)

PDC-015	Detection of <i>Clavibacter michiganensis</i> subsp. <i>michiganensis</i> using PCR for plant materials, water and growth substrates
PDC-103	Detection of Viruses, Bacteria and Fungi in Plant Tissues using ELISA
PDC-104	Baermann Pan Method for Nematode Extraction for extraction of total nematodes, identification and enumeration of plant parasitic nematodes in soil
PDC-106	Nematode Cysts and Eggs Extracted from Soil for extraction and enumeration

MEDICAL

Veterinary

BAC-018	PCR of fecal and tissue samples for <i>Mycobacterium paratuberculosis</i> (MAP) only for: detection in bovine fecal samples
BAC-028	Culture detection of <i>Salmonella</i> spp. and enumeration of bacterial and fungal colonies in hatchery samples and in poultry environmental samples
BAC-029	Culture detection of <i>Salmonella</i> Pullorum, <i>Salmonella</i> Gallinarum and other <i>Salmonella</i> spp. for environmental samples, tissue, and fecal samples
BAC-037	Culture detection of honey bee bacterial pathogens for <i>Paenibacillus larvae</i> , causative agent of American foulbrood (AFB) for bees, honey, hive debris, combs, pollen, environmental hive samples
BAC-040	Culture detection of <i>Salmonella</i> Pullorum, <i>Salmonella</i> Gallinarum, and other <i>Salmonella</i> spp. from suspicious reactor birds for tissue and fecal samples
BAC-041	Whole Genome Sequencing (WGS) of bacterial isolates for bacterial culture
*CHEM-055	ICP-MS analysis of metals in tissues for: antimony, arsenic, barium, beryllium, boron, cadmium, chromium, cobalt, copper, iron, lead, magnesium, manganese, mercury, molybdenum, nickel, selenium, tin, thallium, vanadium, and zinc
*CHEM-057	See Food and Edible Products, above
MOL-180	Scrapie and CWD resistance PrP genotyping for whole blood, tissue, FTA cards
MOL-249	PCR detection of fish viruses for: <ul style="list-style-type: none"> viral hemorrhagic septicemia virus (VHSV) Koi herpesvirus (KHV) infectious hematopoietic necrosis virus (IHNV) infectious pancreatic necrosis virus (IPNV) all for fluids and tissues

V-002	<p>Enzyme linked immunosorbent assays (ELISA) for the detection of:</p> <ul style="list-style-type: none"> • Bluetongue virus (BTV) antibodies³ (based on CFIA method Bluetongue: Enzyme Linked Immunosorbent Assay (IDEXX) for the Detection of Antibodies to Bluetongue virus) in serum • Equine infectious anemia virus (EIAV) antibodies³ (based on CFIA method AHD-11) in serum • Foot and mouth disease virus (FMDV) antibodies³ (based on CFIA method 3ABC Competitive Enzyme-Linked Immunosorbent Assay for the Detection of Antibodies to Foot and Mouth Disease Virus) in serum • Influenza A virus antibodies³ (based on CFIA method Avian Influenza: Enzyme Linked Immunosorbent Assay (IDEXX) for the Detection of Antibodies to Avian Influenza Virus) in serum • Infectious bovine rhinotracheitis virus (IBRV, BOHV-1) antibodies in serum • Porcine reproductive and respiratory syndrome virus (PRRSV) antibodies for serum
V-003	<p>Hemagglutination inhibition (nested method - appendix 19.2, 19.3, 19.4, 19.8 and 19.10) in serum</p> <p>A19.8 Swine influenza virus A/H3N2/swine/Texas/4199-2/98 HI (si3t)</p> <p>A19.10 Swine influenza virus - A/H1N1/swine/Ontario/81 HI (sif) or A/H3N2/human/Colorado/77 HI (si3)</p>

V-005	<p>Polymerase chain reaction for the detection of nucleic acid of:</p> <ul style="list-style-type: none"> African swine fever virus³ (based on CFIA method Detection of African Swine Fever Viruses by Real-time PCR Assay) in blood, serum, swabs, tissues Avian paramyxovirus 1 (APMV-1)³ (based on CFIA method Detection of APMV-1 by Matrix and Fusion Real-Time RT-PCR Assays) in swabs, tissues Classical swine fever virus³ (based on CFIA method Detection of Classical Swine Fever Viruses by Real-Time RT-PCR Assay) in blood, serum, swabs, tissues Foot and mouth disease virus³ (based on CFIA method Real-time Reverse Transcription Polymerase Chain Reaction (RRT-PCR) for the Detection of Foot-and-mouth Disease Virus (FMDV) in blood, scrapings, serum, swabs, tissues Type A influenza viruses and avian H5 and H7 hemagglutinin subtypes by PCR³ (based on CFIA method Detection of Type A Influenza Viruses and Avian H5 and H7 Hemagglutinin Subtypes by Real-Time RT-PCR Assay) in swabs, tissues <i>Pasteurella multocida</i> toxin (PMT) gene in nasal swabs Porcine coronavirus: porcine epidemic diarrhea virus (PEDV), transmissible gastroenteritis virus (TGEV), porcine deltacoronavirus (PDCoV) in swabs, tissues Porcine reproductive and respiratory syndrome virus (PRRSV) in blood, oral fluids, serum, swabs, tissues
V-006	<p>TeSeE® Enzyme linked immunosorbent assay (ELISA) detection of:</p> <p>Bovine spongiform encephalopathy (BSE)</p> <p>Chronic wasting disease (CWD)</p> <p>Scrapie</p> <p>all for obex</p>
V-014	<p>Indirect fluorescent antibody assay (IFA) for the detection of IgG & IgM, IgM or IgG antibodies against porcine reproductive and respiratory syndrome virus (PRRSV) in serum</p>

Number of Scope Listings: 96

Number of TMDNRT Techniques: 21

Notes:

1. Veterinary testing is done at the Animal Health Lab at 419 Gordon St. (building 89), Guelph, ON N1G 2W1 and the Toxicology Lab at 95 Stone Road West, Guelph, ON N1H 8J7. Tests marked with an

asterisk, *, are performed in the Toxicology lab of the Animal Health lab (AHL) at 95 Stone Road West location.

2. The test method acronyms: BAC-, CHEM-, DA-, DRUGS-, EML-, IMC-, MID-, MOL-, PDC-, SNL-, TOPS-, TOXI- and V- denote laboratory in-house test methods except for V- methods flagged with³ and kit methods flagged with⁴.

3. V- methods flagged with ³ are equivalent to the CFIA methods they are based on.

4. Methods that follow kit instructions are flagged with⁴.

AMPA: aminomethylphosphonic acid

RG_TMDNRT: SCC Requirements and Guidance for Accreditation of Laboratories Engaged in Test Method Development and Non-Routine Testing

AOAC: Official Methods of Analysis of the Association of Analytical Community (USA), current edition

MFHPB: Health Protection Branch Compendium Method (Health Canada)
